Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-21 are presented for examination.

Applicant's claim for foreign priority is acknowledged.

Claim Rejections - 35 USC §102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1-7, 12-24, and 29-34, are rejected under 35 U.S.C. 102(e) as being anticipated by **Voticky et al.**, (Voticky) U.S. Patent No. **6,351,764**.

4. As to claim 1, Voticky teaches an electronic message delivery system comprising:

(a) a terminal from which a user is able to browse electronic messages, electronically sent out on a communications network and addressed to the user (col. 2, line 64 – col. 3, line 9);

(b) a permitted-sender list in which permitted-sender information about a permitted sender, whose every electronic message is permitted to be received by the user on said terminal, is registered (Fig. 3, col. 4, lines 14-24);

(c) sender information obtaining means for obtaining sender information from an individual electronic message addressed to the user (Fig. 3);

Art Unit: 2155

(d) checking means for checking as to whether or not said sender information, which has been obtained by said sender information obtaining means, of the lastnamed individual electronic message is identical with said permitted-sender information registered in said permitted-sender list (Fig. 2, col. 4, lines 41-50);

(e) delivering means for delivering said last-named electronic message, which contains said last-named sender information registered in said permitted-sender list, to the user if the result of the checking by said checking means is positive (col. 4, lines 55-62);

(f) a message holder for temporarily holding every electronic message from any sender so as to be browsed by the user from said terminal (col. 4, lines 55-62);

(g) storing control means for storing the last-named electronic message into said message holder if the result of the checking by said checking means is negative (col. 4, lines 55-62);

(h) browsing control means for allowing the individual electronic messages, which have been temporarily held in said message holder, to be browsed by the user from said terminal upon a browsing request of the user from said terminal (Fig. 3);

(i) link setting means for setting a link between said sender information of an individual electronic message, which has been temporarily held in said message holder, and said permitted-sender list while the user is browsing the last-named individual electronic message from said terminal (fig. 4); and

Art Unit: 2155

(j) registering means for registering said sender information of an electronic message in said permitted-sender list when the sender of the last-named electronic message is selected as a newly permitted sender by the user from said terminal (col. 8, lines 35-45).

5. As to claim 2, Voticky teaches an electronic message delivery system according to claim 1, further comprising notifying means for notifying the user that an electronic message has been held in said message holder, if said message holder holds the last-named electronic message therein (col. 9, lines 32-46).

6. As to claim 3, Voticky teaches an electronic message delivery system according to claim 2, wherein said notifying means performs the notification of said last-named electronic message held in said message holder, at prescribed time intervals (col. 9, lines 32-46).

7. As to claim 4, Voticky teaches an electronic message delivery system according to claim 1, wherein said electronic message is an e-mail (Abstract, Fig. 1, col. 3, lines 49-51).

8. As to claim 5, Voticky teaches an electronic message delivery system according to claim 2, wherein said electronic message is an e-mail (Abstract, Fig. 1, col. 3, lines 49-51).

9. As to claim 6, Voticky teaches an electronic message delivery system according to claim 3, wherein said electronic message is an e-mail (Abstract, Fig. 1, col. 3, lines 49-51).

Art Unit: 2155

10. As to claim 7, Voticky teaches an electronic message delivery system according to claim 1, wherein said electronic message is a voice mail (Abstract, col. 8, lines 64-67).

11. As to claim 8, Voticky teaches an electronic message delivery system according to claim 2, wherein said electronic message is a voice mail (Abstract, col. 8, lines 64-67).

12. As to claim 9, Voticky teaches an electronic message delivery system according to claim 3, wherein said electronic message is a voice mail (Abstract, col. 8, lines 64-67).

13. Claims 10-21 are essentially the apparatus and recording medium of the above-mentioned claim; therefore, they are rejected under the same rationale.
